## SOFTWARE DEVELOPMENT ENGINEER (SDE)

Hyderabad, Telangana, India | [tiwariaadarsh830@gmail.com](mailto:tiwariaadarsh830@gmail.com) | [LinkedIn](#)

### PROFILE

Computer Science undergraduate with strong foundation in Data Structures & Algorithms, Java, and object-oriented programming. Experienced in building web-based projects using HTML, CSS, and JavaScript, and solving algorithmic problems on coding platforms. Seeking an Entry-Level Software Development Engineer (SDE-1) role to design, develop, and optimize scalable software solutions.

### SKILLS

|--------|------------|-----|-------|
| Python | Java       | DSA | HTML  |
| CSS    | JavaScript | Git | Flask |

### PROJECTS

#### NatureNest – Toxin-Free Product Discovery & Filtering Platform

Built a static e-commerce product showcase platform for natural and organic products using HTML5, CSS3, and vanilla JavaScript. Product data is stored in structured JSON files and loaded using JavaScript file handling. Developed Python scripts to automate product data entry and perform basic web scraping. Designed responsive, category-wise pages with direct external purchase links.

#### SmoothLLM – Defense Mechanism Against LLM Jailbreaking Attacks

Implemented SmoothLLM, a defense mechanism to detect and mitigate jailbreaking attacks on large language models by analyzing prompt perturbations and output consistency. Evaluated the system against multiple adversarial prompts to measure robustness and attack success rate. Demonstrated how input smoothing and randomized prompt transformations reduce harmful or policy-violating responses.

### PROJECT ACHIEVEMENTS

- Designed and implemented a toxin-free product discovery system enabling users to filter and explore clean personal care products efficiently.
- Built a structured JSON-based product catalog to ensure consistent, scalable storage of product information.
- Automated product data collection and entry using Python scripts, reducing manual effort and errors.
