

PUDARI SRIMAN NARAYANA

Full-Stack Developer | AI Enthusiast

Hyderabad, India

Email: srimanpudari9@gmail.com | LinkedIn: [Pudari Sriman Narayana](#)

SUMMARY

Aspiring AI & Software Developer with hands-on experience in building machine learning–based applications and Python-powered web systems. Worked on real-world projects involving medical image analysis and email spam detection, with strong fundamentals in Python, ML models, and full-stack integration. Interested in applying AI concepts to practical problem-solving and continuously improving system performance.

SKILLS

Languages: Python, Java, Dbms.

AI/ML: Machine Learning Algorithms, NLP basics, Image Processing, Model Training & Evaluation

Frameworks & Libraries : Scikit-learn, Flask, FastAPI, NumPy, Pandas.

Web & Tools : HTML, CSS, JavaScript, Git, REST APIs.

PROJECTS

[Medicat App](#) — Medical Image Captioning System

Developed a medical image-based application that generates textual descriptions (captions) for medical images.

Implemented a Python backend to handle image processing and model inference.

Used structured datasets to map medical images with corresponding captions.

Built a frontend interface to allow users to upload images and view generated medical descriptions.

Focused on improving usability for medical-related AI applications.

Technologies Used:

Python, Machine Learning, Image Processing, Backend APIs, Frontend Web Technologies.

[SpamShield](#) — Intelligent Email Spam Detection System

Built a machine learning–based email spam classifier using supervised learning techniques.

Trained the model on a labeled spam dataset to distinguish between spam and legitimate emails.

Implemented text preprocessing and feature extraction using vectorization techniques.

Developed a Flask-based web application to test emails in real time.

Evaluated model accuracy and stored trained models for reuse.

Technologies Used:

Python, Scikit-learn, NLP, Flask, Machine Learning Models.

PROJECT ACHIEVEMENTS

- Developed two machine learning–based applications from scratch.
 - Implemented complete ML workflows including preprocessing, training, and testing.
 - Integrated ML models with web applications using Python frameworks.
 - Gained practical experience in applying AI concepts to real-world problems.
-

EDUCATION

B.Tech, Computer Science Engineering

Keshav Memorial College of Engineering, Hyderabad

Expected Graduation: 2027
